Swen Sonic, pioneers of commercial ultrasonic cleaners, is now producing complete cleaning, rinsing, rust inhibiting and drying systems designed for use in fully automatic line operations.

Ultrasonic cleaning provides the rapid removal of production residues from intricate or delicate parts and assemblies in a fraction of the time required by other methods.

Swen Sonic systems feature ultrasonic cleaning units driven by Swen's zero-spaced nickel transducers guaranteed for 10 years continuous operation. Vertical agitation can be provided to insure full exposure to fluid action in complex assemblies.

Swen Sonic engineers and chemists stand ready to share their experience in a wide range of ultrasonic cleaning applications, and to propose a system to meet your needs. Just give us a call at 319-322-0144.
